PROFILE

Flutter Developer and Information Technology Engineering student with hands-on experience building real mobile applications and system-oriented projects. Passionate about clean architecture, animations, and user-centered design. Portfolio showcases selected projects with interactive demonstrations and real-world use cases. Seeking internship or junior Flutter opportunities.

TECHNICAL SKILLS

- Flutter, Dart
- State Management: Bloc, GetX
- REST API Integration
- UI Development & Animations
- Git & GitHub
- Java, C++
- HTML, CSS (Basics)

PROJECTS

1. Advanced Banking System (University Project)

A modular banking system designed to demonstrate software engineering concepts.

- Designed system structure using OOP principles
- Implemented account management (create, update, delete)
- Implemented deposit, withdrawal, and transfer operations
- Applied data validation and error handling

Technologies: Java, OOP, Data Structures

Source: GitHub

2. Pharmacy Management & Medication Recommendation App

Flutter app for managing pharmacy inventory and recommending medications.

- Built user & pharmacy roles flows
- Integrated REST APIs for dynamic data
- Implemented state management using Bloc and GetX
- Focused on performance and clean UI

Technologies: Flutter, Dart, Bloc, GetX, REST APIs

Source: GitHub

3. Task Trove – Job Platform Mobile App

Mobile application connecting job seekers with companies.

- Implemented authentication and profile screens
- Built job listing screens and admin interfaces
- Added animations to improve user experience

Technologies: Flutter, Dart, GetX

Demo video available upon request
