SUMMARY

Flutter Developer and Information Technology Engineering graduate (Damascus University, Software Engineering, 2026). I build cross-platform mobile and web applications with Dart and Flutter — Clean Architecture, Bloc/Cubit and GetX, REST API integration, Firebase, and RTL-first Arabic/English interfaces. Built the Fantasy module of the Syrian Premier League app at Widespheres and led two modules of the DT.Teeth graduation project.

EXPERIENCE

Flutter Developer — Widespheres Jun 2026 – Aug 2026

Advanced Training Track · Syrian Premier League mobile app · team of 4 developers · Damascus

- Built the Fantasy module end-to-end: 4-3-3 pitch lineup with captain and super-sub, wildcard and transfer modes, team management, player pick list, multi-tab player details, and onboarding for users without a team — connected to the live Fantasy API
- Added a Match Center notifications screen with unread badge and deep links, and a news video player (YouTube + HLS)
- Integrated REST APIs for teams, player details, standings and top scorers; implemented the OTP login flow, auth-gated routing and logout
- Ran Clean Architecture refactors across screens (Cubit + Freezed), moved strings to Arabic/English localization, fixed RTL layouts, and matched Figma designs

Flutter Mobile Intern — Widespheres Mar 2026 – May 2026

Foundational Track · Damascus

- Developed a full educational mobile app following Clean Architecture with go_router, flutter_screenutil and a custom design system
- Pixel-perfect screens from Figma with Git branching and code review · Recognized as Top Intern of the Week

Flutter Developer — Freelance Jan 2024 – Aug 2024

- Built cross-platform Flutter apps from concept to deployment: custom UI, animations, REST APIs, role-based authentication and admin interfaces

PROJECTS

DT.Teeth — Dental Clinic Management System 2025 – 2026

Graduation project, Damascus University · Flutter Web, Laravel 11, MySQL, Firebase FCM, BLoC, GoRouter, GetIt, Dio, Freezed

- Led the Warehouse and Lab Manager modules of a multi-platform system (React dashboard, Flutter mobile, Flutter Web)
- Dark/light themes, RTL-first Arabic/English localization, real-time notifications, a custom OTP authentication flow and a reusable shared widget library

Pharmacy Management & Medication Recommendation App Completed · in testing

Flutter, Bloc, GetX, Dio, Freezed, GetIt · role-based flows for users and pharmacy admins with paginated REST APIs

Eshtikily — Government Complaints App Mobile

Flutter, REST APIs, OTP authentication, Arabic RTL

Also: Civil Status Automation System — Syria (government-coordinated team project, on hold · Flutter, REST, Clean Architecture) · Task Trove — job platform app (Flutter, GetX · auth, job listings, admin interfaces, animations)

EDUCATION

B.Sc. Information Technology Engineering — Damascus University 2021 – Aug 2026

Specialization: Software Engineering · Cumulative GPA: 71.00%

SKILLS

Languages & frameworks	Flutter, Dart, Java, C++, HTML, CSS
State management	Bloc / Cubit, GetX
Backend & services	REST APIs, Firebase (Auth, Firestore, FCM), Laravel integration
Tools & practices	Clean Architecture, Git & GitHub, Freezed, GetIt, Dio, GoRouter, UI/UX, animations, performance
Languages	Arabic (native) · English (professional working proficiency)
