PROFESSIONAL SUMMARY

Flutter Developer with 1+ years of hands-on experience building cross-platform mobile applications using Dart and Flutter. Skilled in clean architecture, state management (Bloc, GetX), REST API integration, Firebase services, and UI/UX implementation. Recognized as Top Intern at Widespheres for exceptional dedication. Experienced in collaborative development, Git workflows, and delivering production-ready features. Passionate about animations, performance optimization, and modern mobile development practices.

TECHNICAL SKILLS

Languages & Frameworks: Flutter, Dart, Java, C++, HTML, CSS

State Management: Bloc, GetX

Backend & Services: REST API Integration, Firebase (Auth, Firestore, FCM)

Tools & Practices: Git & GitHub, Clean Architecture, UI/UX Development, Animations, Performance Optimization

EXPERIENCE

Flutter Mobile Intern — Widespheres

Damascus, Syria | 2025

- Developed a full educational mobile application as part of the Mobile track internship, following Clean Architecture with `go_router`, `flutter_screenutil`, and a custom design system
- Recognized as 'Top Intern of the Week' for exceptional dedication and high-quality, pixel-perfect UI implementation
- Implemented complex screen flows including course details, navigation patterns, and responsive layouts matching Figma designs
- Collaborated with team members using Git branching workflows and code review processes

Flutter Developer — Freelance

01/2024 – 08/2024

- Developed complete cross-platform mobile applications using Flutter from concept to deployment
- Implemented custom UI designs, animations, and integrated REST APIs for dynamic data handling
- Built role-based authentication flows and admin interfaces
- Delivered full-featured solutions independently, managing the full development lifecycle

PROJECTS

DT.Teeth — Dental Clinic Management System *(Graduation Project – In Progress)*

Technologies: Flutter Web, Laravel 11, MySQL, Firebase FCM, Clean Architecture

- Leading development of Warehouse and Lab Manager modules within a multi-platform dental clinic system
- Building Flutter Web applications with dark/light theme support, responsive layouts, and real-time notifications
- Integrating with Laravel 11 REST backend and Firebase Cloud Messaging for push notifications
- Collaborating across a multi-developer team with React dashboard, Flutter mobile, and Flutter Web components

Pharmacy Management & Medication Recommendation App *(Completed – In Testing)*

Technologies: Flutter, Dart, Bloc, GetX, REST APIs, Freezed, GetIt, Dio, Clean Architecture

- Built role-based flows for users and pharmacy administrators with clean architecture (`datasource` → `repo` → `cubit` → `screen`)
- Integrated paginated REST APIs for dynamic inventory and medication data handling

- Implemented Bloc and GetX state management for performance and maintainability
- Application completed and currently in stakeholder testing phase ahead of v2 release

Civil Status Automation System — Syria *(On Hold)*

Technologies: Flutter, Dart, REST APIs, Clean Architecture

- Contributed as a developer in a government-coordinated team project to digitize civil status processes
- Built modular architecture and scalable UI components with REST API integration
- Project currently on hold pending coordination with the relevant government authority

Task Trove — Job Platform Mobile App

Technologies: Flutter, Dart, GetX

- Implemented authentication, profile screens, job listing flows, and admin interfaces
- Added custom animations and transitions to enhance user experience

EDUCATION

B.Sc. Information Technology Engineering

Damascus University | 2021 – 2026 (Expected)

LANGUAGES

Arabic: Native | **English:** Professional Working Proficiency
